

CURRICULUM VITAE (CV)

Jin-Bin Im – Ph.D.

Hanyang University, Department of Architectural Engineering

Client Briefing & Program Management (CB&PM) Lab

Webpage: <https://jinbin-im.github.io/>

E-mail: jbim0202@hanyang.ac.kr

SUMMARY

- **Expertise** – AI-driven human-centered architectural design, affective spatial computing, occupant experience assessment, extended reality, physiological responses, BIM-integrated design automation
- **Interdisciplinary background** – Grounded in Interior Architecture Design, advancing engineering research that bridges spatial design thinking with computational methods and biometric-driven design.
- **Publication** – I have published multiple peer-reviewed articles in high-impact international journals in the fields of architectural design, computational design, and the built environment, including *Architectural Science Review* (A&HCI, top 2.58%), *Building and Environment* (IF 7.6), *Architectural Engineering and Design Management* (IF 2.7), and *Journal of Management in Engineering* (IF 7.0).
- **Academic Service** – I have served the academic communities as a reviewer of high impact journals, such as, *Building and Environment*, *Architectural Engineering and Design Management*, and *Journal of Management in Engineering*.

RESEARCH INTERESTS

- **AI-Driven Architectural Design & Computing**
 - Affective computing for spatial design generation
 - Client requirements-driven automated design optimization
 - Evidence-based decision support systems for personalized architectural design
- **Immersive Virtual Environment for Spatial Experience & Occupant Assessment**
 - XR (VR/MR) platforms for immersive co-design and real-time spatial experience with clients
 - Human-space interaction and occupant behavior analysis in dynamic architectural environments
 - Sensor-driven evidence-based design for health and well-being assessment
- **Human-Centered Digital Workflows & BIM Integration**
 - End-to-end pipelines from multimodal data acquisition to BIM-linked structured output
 - Natural language processing for translating user requirements into design parameters
 - Interoperable digital design frameworks supporting downstream lifecycle analysis

EDUCATION

Hanyang University

Mar. 2020–Aug. 2026

M.S/Ph.D. in Architectural Engineering, Construction Management

Dissertation title: “Distribution-aware Affective Requirement Realignment for User Interactive Spatial Design Revision”

Hanyang University

Mar. 2014–Feb. 2020

B.S. in Interior Architecture Design

EXPERIENCE

- Research Assistant**, Hanyang University, *Dept. of Architectural Engineering* Mar. 2020–present
- *Development of Multi-functional Construction Robots to Enhance Productivity in Apartment Housing Construction* Apr. 2026–present
 - *Development of Artificial Intelligence-based Real-Time Construction Quality Management System.* May. 2024–present
 - *Study on Quality Control of Educational Facilities using Virtual Environments.* Oct. 2023–Oct. 2024
 - *Development of Decision-making Framework to Support Personalized Spatial Composition based on Temperament, Perception and Bio-markers Applying Digital Twin.* Sep. 2021–Feb. 2024
 - *Construction Quality Control using Digital Twin Technology.* Apr. 2021–Dec. 2022
 - *Establishment of Standard Guidelines for Daycare Centers in Police Stations.* Jun–Sep. 2021
- Internship**, SIFC Property Korea YH Nov. 2019–May. 2020
- *Property management for IFC Seoul, particularly an IFC Mall (85,444m² GFA).*
- Research Intern**, Hanyang University, *Dept. of Interior Architecture Design* May–Jul. 2019
- *Spatial Preference Modeling based on Immersive Virtual Environment and Choice Modeling Theory.*

TEACHING

- Instructor**, Korea University of Technology and Education 2026
- *AI-based Optimization Technology for Architectural Design*
- Teaching Fellow**, Hanyang University, *Dept. of Architectural Engineering* 2024–2025
- *PBL4004 Architectural Engineering Capstone PBL* Fall 2025
 - *ENE4044 Computer Engineering* Spring 2024, 2025

SERVICE

- Reviewer**, *23rd Smart and Sustainable Built Environment (SASBE)* 2026
- Reviewer**, *Acta Psychologica* 2026–present
- Reviewer**, *Results in Engineering* 2026–present
- Reviewer**, *Journal of Management in Engineering* 2026–present
- Reviewer**, *Architectural Engineering and Design Management* 2025–present
- Reviewer**, *Building and Environment* 2025–present

PATENT

- *South Korea Patent, No. 10-2421360, “System for Generating 3D LiDAR Scanning Position.”* Jul. 2022

• REFERRED JOURNAL

- [J14] Hong, R. L., **Im, J. B.**, Kang, H. G., & Kim, J. H.* (2026). Prediction of structural frame works safety and health management expenses in apartment construction projects by introducing interpretable machine learning. *Engineering, Construction and Architectural Management*, Emerald. IN-PROGRESS RESEARCH

[In 1st Round Revision] Visual quality features in immersive virtual environments: A systematic review of their impact on user experience. Submitted to *Virtual Reality*.

[In Review] Optimizing Immersive Virtual Environments for Architectural Design Review: The Impact of Visualization Quality on Occupant-Centric Performance Assessment. Submitted to *Journal of Building Engineering*.

[In Review] Strategic Pathways for e-Methanol Deployment in the Low-Carbon Transition: Policy Modeling of Cost Competitiveness and Flexibility Requirements in Korea. Submitted to *Energy Strategy Reviews*.

[In Review] Beyond Viewing: How Installation Artwork Design Modality Shapes Visitor Satisfaction Through Affective and Behavioral Pathways. Submitted to *the Design Journal*.

[In Review] Weather-adaptive automated pipe counting for open-air construction storage: Leveraging synthetic data augmentation and YOLO-Network Family. Submitted to *Journal of Computing in Civil Engineering*.

[Manuscript Completed] End-to-End Distribution-Aware Affective Requirement Realignment in BIM-Native Design Revision through Natural Language

[Manuscript Completed] Toward affect as a quantifiable design requirement: modelling the multi-dimensional affective response of residential interiors

[In Preparation] Effect of Changing Sequence in Semi-Top-Down Construction Works to Optimize Time and Cost: A Case Study on Korean Apartment Projects

[In Preparation] Application of Two-Level Game Theory to Urban Redevelopment Project Duration: A Mixed-Methods Study of Seoul Cases
